Horizontal Mount Enclosure Washdown System

This design will allow you to mount the enclosure in the cockpit and out of the way. The enclosure can be easily attached to an external water hose connection using the five-foot supply hose that comes with a 3/4" "garden style" solid brass fitting, or attach directly to a washdown pump or raw water supply line. Adapter fittings are included to fit 3/8", 1/2", and 5/8" hose.

The Horizontal Mount Enclosure is white in color and includes a solid blue 25' HoseCoil with a yellow nozzle. Enclosure dimensions: 20.5"(L) x 9.5"(H) x 5"(D).

Denatured Alcohol

Prime grade ethanol. Excellent for spirit stoves, chafing dish fuel or thinning shellac products.

ORDER NO.	SIZE	STD CTN.	PRICE
PRK 2125	Qt.	12	\$8.15

Mineral Spirits

A high grade, quality solvent, low odor.

Thinning: A general purpose solvent. Use with most oil based paints, varnishes, stains, polyurethanes and wiping oil finishes. Do not use with shellac, lacquers or latex paints. Helps increase flow and reduce brush drag or pull. Extends drying time slightly. Aids leveling.

Cleaning: A mild solvent. Use to clean painting tools while coating is still wet.

Recovery Mat

A non-woven polypropylene geotextile that separates and filters waste while allowing water to pass through. Recovery mats are typically placed under a boat before being blocked for winter storage. This insures that the mat is in place for spring bottom paint removal, sanding, grinding, etc. The waste and droppings from these activities will then be captured by the mat and not contaminate the soil or waterway through run-off.

Spra-tool®
A versatile and economical spray gun with all the convenience of an aerosol can.

Spra-tool® is the quick and easy way to accomplish everything from the small craft project to touching up paint. It provides a controlled spray pattern for even coverage and sprays most liquids, including higher-viscosity paints such as latex. There are no wires to hook up, no batteries, or bulky compressors. Interchangeable spray tips accommodate a variety of product viscosities. Can be used to spray lacquers, varnishes, stains, oil- and water-based paints, lubricants, cleaners, insecticides, weed killers, fertilizers, water, and multi-colored spatter coatings. Kit 8209 comes with Power pack, jar with cap, snap on head with two extra tips.

THE TWO MOST EFFECTIVE EXAMPLES OF ULTIMATE PROTECTION FOUND IN THE SEA

THE WORST FOULING AND THE SLIMIEST SLIME WON'T DARE COME CLOSE TO ULTIMA SR-60. WITH A FULL 60% COPPER AND A FEROCIOUS ANTI-SLIME ADDITIVE, ULTIMA SR-60 IS THE TOUGHEST MULTI-SEASON ABLATIVE ANTIFOULANT IN THE WORLD. THOSE ARE POWERFUL AND SCARY POINTS, WHETHER YOU'RE THE MOST AGGRESSIVE FOULING AND SLIME, OR MERELY THE COMPETITION.

Going GREEN?

We've Been Green for Over 40 Years

We introduced the first waterbased anti-foulants over 40 years ago. We continue to lead the way with our Enviro-Friendly products, making EPA registered products that will help keep the air and water clean while exceeding VOC standards.

Our line of Enviro-Friendly products are also People-Friendly. They're water-based so they're easy to apply, easy to clean-up and have NO toxic-fumes.

Be a superhero and save the world, choose our Enviro-Friendly Products.

MÖLLER

Zinc Primers

- For aluminum surfaces above or below the waterline use our Zinc Chromate. This powerful primer etches into the aluminum, forming a strong surface/primer union that is resistant to corrosion.
- For steel and iron surfaces, especially welded joints, above or below the water line, use our Zinc Cold Galvanizing or Zinc Phosphate. This corrosive barrier contains a high percentage (95%) of zinc, for maximum resistance against solvents & abrasions.

ORDER NO.	DESCRIPTION	PRICE

PETTIT
marine paint

Zinc Coat Barnacle Barrier

This product is for use only on bare metals such as steel, stainless steel, cast iron, copper, bronze, galvanized steel and lead. It forms an excellent adhesive bond to underwater metals and running gear and inhibits corrosion on these surfaces. Because of its smooth, hard surface it will self-clean in service.

Do not apply antifouling paint over Zinc Coat.

EPIFANES

Gloss Varnish

Outstanding – exceptional – highest quality: all are used to describe our Dutch varnish, giving it the reputation for being the best in the world. This marine spar varnish is manufactured with a long base of Chinese tung oil combined with non-yellowing alkyd and urethane resins and blended with a perfect balance of U.V. inhibitors. Used and tested in the Caribbean for over 25 years. EPIFANES has proved to last two to three times longer than its best competition.

AQUAGARD AQUAGARD® II for Aluminum Hulls – Alumi-Koat

A tin free water based paint specifically designed for coating aluminum hulls. It is environmental and customer friendly. No harmful fumes. It reduces VOC emissions during application, and reduces the risk of toxic solvent exposure to the user. After application the boat can be launched after 24 hours or any time up to 12 months. When boat is removed from water, paint will de-activate during storage and re-activate when replaced in water. Easy application and cleans up with water. Fortified with Bio-Shield™.

AQUAGARD

Waterbase Antifouling Boat Bottom Paint

A fast drying, ablative Waterbase Antifouling bottom boat paint that can easily be cleaned up with soap and water. It is EPA registered and environmentally responsible. May be used over previously painted fiberglass or wooden boats without the need of a primer, provided the surfaces are prepared properly.

- Can be applied indoors to bottom of boats
- Coverage approximately 400 sq. ft./gallon
- Can be burnished
- Painted boats can be stored up to 12 months before launching

MDR Anti-Fouling

Inflatable Boat & Dingy Bottom Coating

MDR's Bottom Coating is a flexible vinyl, waterbased anti-fouling coating containing cuprous oxide for maximum protection against barnacles and other marine growth in fresh and mid-temperature range saltwater. It can be used on most inflatable materials including Hypalon, PVC and rubber. Inflatables can be deflated and rolled without cracking bottom coating. One quart will provide two coats of protection for the average eight to ten foot boat.

Polyester Urethane Topcoat

For years, serious boat owners have demanded AWLGRIP® coatings systems to protect their valuable investments from harsh marine elements. AWLGRIP® provides a durable high gloss finish to wood, fiberglass, aluminum or steel and can be applied with a roller, brush or spray gun. With its superior resistance to sun, saltwater, chemicals and abrasion, AWLGRIP® is ideal for coating everything from topsides, cabin tops, decks and masts to engines.

Features:

- Long lasting; high gloss
- Superior resistance to sun, saltwater, chemicals and abrasion
- Appropriate for use on fiberglass, steel, wood and aluminum
- Low maintenance
- Above the waterline use only
- Available in quarts and gallons
- Custom colors available

FOR PROFESSIONAL USE ONLY

NEW

AWLGRIP

Awlgard Interior Urethane

For interior applications in engine rooms and other areas where a durable urethane is required and the application of a solvent borne coating is impractical. This two component urethane has excellent solvent resistance to denatured alcohol and acetone as well as diesel fuel and anti-freeze. Gloss retention and heat resistance to 180° F are excellent. Unlike most water based urethanes, AWLGARD is shelf stable and has excellent hiding characteristics. Apply using brush, roller, or spray. AWLGARD Topcoats are not to be used to paint marine engines. They are fine in the engine room, but use AWLGRIP® to paint the engine(s).

AWLCRAFT
2000

Acrylic Urethane Topcoat

AWLCRAFT® 2000 is an acrylic based polyurethane coating designed only for spray application. When topcoat application conditions are far from ideal, AWLCRAFT®2000 is the coating that will deliver a smooth, high gloss finish. Producing a rich lustrous finish similar to our famous AWLGRIP®, AWLCRAFT®2000 is ideal for use in situations where dust or fluctuating temperatures are a potential problem or where faster project turn-around time is critical. Its unique, fast drying formula helps reduce dust-free time between coats.

Features:

- Easy application
- Quick drying
- Long lasting, mirror-like finish
- For use above the waterline only
- Custom colors available
- See following page for other components

AWLGRIP

Awlstar Gold Label Antifouling HS

Features and Benefits

- Self Polishing system delivers controlled biocide release throughout the season
- Suitable for Steel / Fiberglass / Wood substrates
- Available in 5 colors
- New lower VOC formulation

Awlstar HS Gold Label Antifouling boasts a unique cleaning mechanism which prevents the permanent attachment of slime and other types of fouling organisms. The self polishing antifouling ablates away at a controlled rate, continuously revealing a fresh, active layer at the surface. Awlstar HS Gold Label inhibits fouling growth and prevents build up of paint layers.

Awlstar HS has been designed to be applicable for both spray and brush. The new formulation now has a lower VOC content, thus reducing the negative impact on the environment.

For use below the waterline only. Do not use on Aluminum hulls. For professional use only.

AWLGRIP Awl®spar H.S. High Solids Marine Varnish M3146

Features & Uses

New technological advances allow AWLSPAR H.S. more build per coat with maximum gloss and durability. This improvement creates a product with higher solids and less solvent (VOC). This single component product has excellent application characteristics by brush or spray and can be over coated with AWL®-BRITE Clear Urethane in as little as seven days to achieve the Ultimate Bright Work System. The end result of this product development collaboration is an improved, longer lasting, full gloss finish for marine bright work. Uses # T0016 Reducer for Brushing.

AWLGRIP

**Awl-Coat TPC
Temporary, Protective Coating**

A single component, waterbased coating that dries to form a tough, protective film - that can be easily removed upon build completion or delivery. Awl-Coat TPC has been designed to provide excellent temporary protection against a wide range of contaminants such as dust, oil, grease and other boatyard debris. The product will guard against most types of damage to Awlgrip products during transit, assembly and installation.

Due to the nature of the very tough, continuous film, Awl-Coat TPC is ideal where temporary measures are required to protect the new paint job, e.g. in production environments. Once removed the material can be compacted by hand to minimize volume of waste disposal.

T0005

Hot Weather Reducer for Urethane Topcoats
Use T0005 in Awlgrip/Awlcraft 2000 Topcoats when application and cure temperatures are **90°F to 105°F** T0005 is most often used as an additive, blended with other spray reducers to improve flow. T0005 is seldom the sole reducer

T0006

Standard epoxy reducer for spray application of 545 Epoxy Primer, Awlquik, Sprayable Fairing Compound, 30-Y-94, Max Cor CF, High Build and Ultra Build Epoxy Primer. Also recommended for Hullgard Extra Epoxy Primer

T0031

Brushing Reducer for Epoxy Primers and Urethane Topcoats
Use T0031 in Awlgrip Topcoats, 545 Epoxy Primer, and Awlquik Sanding Surfacer in brush/roller applications. T0031 evaporates very slowly, keeping the paint film open, maximizing flow and leveling while minimizing brush marks and roller stipple

Antifoulings

Fiberglass Bottomkote ACT – Single Season Ablative

ACT uses Ablative Technology to provide excellent season-to-season protection. Ablative Technology enables it to erode away with use and eliminates the build-up of old spent coatings and the heavy sanding needed to remove them. ACT provides excellent protection against all forms of marine fouling in waters with moderate to heavy fouling and can be used in fresh, salt and brackish waters.

- Best value Ablative Antifouling protection
- Flexible application schedule, paint in the Fall and launch in the Spring.

Micron® Extra with Biolux® – Multi Season Ablative

Micron® Technology provides the longest lasting, multi-season protection. Controlled polishing means that Micron® gets smoother with time maximizing fuel efficiency and uses less Copper more efficiently than hard high copper bottom paints. Haul and relaunch without repainting. Biolux® technology blocks slime and improves antifouling performance. Suitable for use on all boats in all waters.

Micron® CSC® – Multi Season Ablative

Uses Micron® Technology to provide excellent, long lasting antifouling protection against all types of fouling. Controlled polishing means that it wears away like a bar of soap, reducing buildup of old coatings and minimizing sanding at reapplication. It can be hauled and relaunched without repainting. Uses less copper more efficiently than old fashioned high copper bottom paints. Suitable for power and sailboats.

Micron® 66® – Multi Season Ablative

Outstanding antifouling performance in the harshest fouling conditions for 2 years and beyond. A long lasting Self Polishing Copolymer with Biolux® formulated to provide a level of antifouling protection not previously available in any paint. It polishes and becomes smoother with use, reducing drag and fuel consumption, leading to significant reduction in Carbon Dioxide and Sulfur Dioxide emissions. It can be hauled and relaunched without recoating and the polishing action reduces build-up, hence minimizing sanding at reapplication. Maximum protection even during stationary periods at the dock or mooring. Formulated specifically for professional application. Not for use in fresh water. (use in Salt water)

Antifoulings

Fiberglass Bottomkote® Classic – Hard Modified Epoxy

A hard modified epoxy, fast dry antifouling paint with clean stable colors that has been developed to provide effective season-long protection on all power and sailboats. The fast dry formula allows the boat to be painted and launched in the same day. Fiberglass Bottomkote® Classic is recommended for use on the underwater areas of fiberglass, wood, and properly primed metal (except aluminum) boat hulls. It can be used in fresh, salt and brackish waters. Overcoats any existing bottom paint.

Pacifica Plus – Copper Free Dual Biocide

Designed for those looking for a copper free antifouling. Pacifica Plus is a dual biocide antifouling that uses Biolux® Slime Blocking Technology to combat slime and Econeal® to ward off barnacles and zebra mussels. Because it wears away with use, the performance of Pacifica Plus is directly related to the amount of paint applied (thin film thickness may lead to premature fouling). Pacifica Plus is available in bright colors.

- Fast dry, low odor.
- High solids, reduced solvent emissions.
- Polishing action for improved fuel efficiencies.
- Suitable for all substrates, including aluminum.

VC17m® Extra with Biolux® – Freshwater

A thin film antifouling paint for racing sailboats and powerboats that is formulated with Fluoro microadditive to reduce friction and drag. When applied the VC®17m Extra will immediately give a hard, super smooth, racing finish that would normally take days of tiresome sanding. VC®17m Extra incorporates the Biolux® technology along with the metallic copper to achieve complete protection in freshwater or low fouling saltwater. VC®17m Extra is great for use on inflatables.

Primers & Interprotect

InterProtect® 2000E

Interprotect® 2000E with Microplates® is a unique two-part epoxy coating developed to protect fiberglass hulls from water absorption, which can lead to osmotic blistering. Microplates® create an overlapping barrier to help stop water migration through the coating. The Interprotect® system is the system of choice for repairing gelcoat that has already been damaged by osmotic blistering. Interprotect® 2000E can be used above and below the waterline as a universal primer for all surfaces and has proven itself to be an excellent primer for all metals. It also can be used as part of a no sand system. Available in two colors, Gray and White, so you can alternate colors to ensure full coverage.

Varnishes and Polyurethanes

Compass

Fast Dry, High Durability, High Gloss Polyurethane Varnish

Compass, a fast-drying, highly durable one-part polyurethane gloss varnish, allows you to reduce your work time and labor efficiency without compromising on aesthetics or protection. Apply two coats per day—the fast-drying formulation minimizes dust contamination—and sand only after every second or third coat. Contains HALS and UV absorbers to increase lifespan of coating.

Schooner® Gold

Advanced Schooner Gold Varnish With UV Protection

Offering higher film build that allows both Professional Applicators and boat owners to achieve great results faster and in fewer coats. Schooner® Gold has shown to out-perform other leading brands and will offer superb longevity and durability.

- Advanced UV Technology
- Longest lasting one-part varnish
- Traditional amber color.

Perfection® Plus

A high performance clear polyurethane, offering multiple solutions from one product, Perfection® Plus delivers the ultimate in clear wood coating performance. The chemical cure urethane formulation combines with a best-in-class UV and HALS package to offer outstanding chemical and abrasion resistance and superb gloss and gloss retention that lasts four times longer than conventional one-part varnishes.

- Exceptional gloss and gloss retention.
- Fully compatible with oily woods like teak and iroko after adequate degreasing and substrate preparation
- Chemical cure gives resistance to fuels, oil and mild acids and alkalis
- Up to four times longer service life than ordinary varnishes
- Can be used in combination with Perfection Finish as a glaze coat (when professionally sprayed) to increase flow, leveling and durability.

Clear Wood Sealer

- Seals wood grain and forms a base for varnishes or topcoat finishes.
- Fast drying formula, multiple build coats in one day.
- Clear appearance for use with Varnishes.
- Ideal wood sealer for Professional Applicators wanting to reduce the overall work/labor time per project.
- Four Professional use.

Fiberglass Surface Prep YMA601

A mold release agent remover, which precludes the need for sanding bare fiberglass. As part of a no sand system on fiberglass it is used to thoroughly clean the gelcoat and provide a key for no sand primer to be applied. Fiberglass Surface Prep can be used with InterProtect® 2000E, Fiberglass No Sand Primer YPA200 and Low V.O.C. Fiberglass No Sand Primer YPA142. It can also be used to clean the amine blush off of clear epoxies. Pink color for easy application and visibility when preparing gelcoat.

Low VOC Fiberglass Solvent Wash 202V

Low VOC Fiberglass Solvent Wash 202v is a mold release agent remover used for preparing bottoms of new boats before applying antifouling paint. Low VOC Fiberglass Solvent Wash is used to thoroughly clean the gelcoat and remove contamination prior to using an Interlux® no-sand system or sanding bare fiberglass. Removing contaminants from the fiberglass is extremely important if full adhesive qualities of Interlux no-sand systems are to be realized. Low VOC Fiberglass Solvent Wash meets all VOC regulations and can be used in any air quality management district.

Fillers

Watertite® YAV135

Epoxy Filler for above or below waterline

WATERTITE® is a 2-part; easy to use epoxy compound for filling holes and repairing scratches in gelcoat and fiberglass above and below the waterline. It has a long easy-to-sand window and can be applied to a thickness of 3/4" without sagging. Its superior spreadability makes it an ideal glazing compound for filling small nicks and scratches.
