T-TOP Stainless Steel with Uprights

NEW

Clean and simple design is easily installed on your center console boat in 3 to 4 hours using common household tools. Patented adjustment system to fit all center consoles from 26-1/2" to 54" wide. Front V-brace system provides stiffness and comes with necessary fittings to mount on the V on either side of your windshield. Swivel feet allow uprights to be mounted closer to console base for more walking clearance. Provides 76" clear headroom. Internal wireways for wiring lights and antennas. Choose either standard upright kit or the highbar upright kit, which provides 42" clearance so tall console access doors can open freely. Choose a canopy color to match your boat and 4 console standoff braces to complete the installation, sold separately. Canopy made from durable Sunbrella® fabric and is 60"W x 84"L.

BIMINI TOPS

Carver Bimini Tops with Matching Boot

- Full Frame Tops
- No assembly required
- Easy do it yourself installation
- No freight charges on stocked tops

Our bimini tops are offered in two top quality materials:

- 9.25 oz. Sunbrella 100% woven acrylic material with a finish that resists water, mildew, rot, sun and fading. Available in the following colors: Aqua Marine, Burgundy, Cadet Gray, Navy, Pacific Blue, and Mediterranean Blue.
- 14 oz. White vinyl with denim backing that features a waterproof, all-weather finish that is resistant to dirt, grease, and mildew. Easy to handle, fold and store.

HOW TO SELECT A BIMINI TOP FOR YOUR BOAT

To select a bimini top for your boat you will need to know the length, height and width of top your boat requires.

- First determine what portion of your boat you want the top to cover. The tops come in 5', 5'6", 6', 8' and 9' lengths.
- Next, determine where you want the top mounted. Measure the width between these two points to determine the width of your top. All mounting hardware is included with our tops including universal deck hinges with 90 degree stops to allow mounting in virtually any position.
- Then, stand inside your boat and measure the distance in height from the mounting points to the height you desire. This will help you determine how high your top needs to be.
