PETTIT
Simply better.

ULTIMA SR 40

An antifouling protective coating resistant to slime, algae, barnacles and other marine fouling. The combination of cuprous oxide with an organic algicide offers unprecedented control over all types of fouling even in the most severe fouling areas. Its unique controlled erosion minimizes coating build up and keeps underwater surfaces smooth and clean.

- Dual Biocide with Ablative technology
- Great protection using less copper
- Slightly Cleaner Colors and will apply a little smoother due to the lighter copper loading

Fiberglass Bottomkote® NT

Fiberglass Bottomkote NT is a very durable coating, preventing premature wear-through, yet it has a slow polishing effect that keeps the hull clean & smooth without the heavy paint build-up you can get year after year with a traditional hard antifouling. With its fast drying properties, you can paint and launch the boat the same day!

Fiberglass Bottomkote® Aqua

Hard acrylic antifouling paint provides a hard, scrubbable finish that gives premium protection from all forms of fouling. It can be used on either cruising or performance boats and can be wet-sanded to provide a smooth racing finish. Fiberglass Bottomkote® Aqua is low in VOC, which limits solvent emission into the atmosphere and can be cleaned up with soap and water.

EPIFANES Gloss Varnish

Outstanding — exceptional — highest quality: all are used to describe our Dutch varnish, giving it the reputation for being the best in the world. This marine spar varnish is manufactured with a long base of Chinese tung oil combined with non-yellowing alkyd and urethane resins and blended with a perfect balance of U.V. inhibitors. Used and tested in the Caribbean for over 25 years. EPIFANES has proved to last two to three times longer than its best competition.

PETTIT Simply better. Zinc Coat Barnacle Barrier

This product is for use only on bare metals such as steel, stainless steel, cast iron, copper, bronze, galvanized steel and lead. It forms an excellent adhesive bond to underwater metals and running gear and inhibits corrosion on these surfaces. Because of its smooth, hard surface it will self-clean in service. Do not apply antifouling paint over Zinc Coat.
